Back to Back Drawing

write or draw on each other's back, then, the person that was drawn on tries to identify the word or drawing sparking a conversation about the illustration. What was it? or What did it say?

Learning benefit / Skills developed

- Stimulate your child's visual memory skills in a multisensory way.
- Encourages children to use their imagination and concentration skills.
- Helps children make a connection between visuals and words
- Develops social and communication skills.

Variation

- This game can also be played with paper fixed to another's back and as a player draws, the person being drawn on also tries to recreate the drawing on paper in front of them, then players can compare both pictures at the end.
- This game can also be played between children.

Instructions

- Play the game, using your finger to draw on each other's back. (Or play the paper version,

where each player draws a message/drawing) Take turns.

- The person that was drawn on tries to identify the word or drawing sparking a conversation about the illustration. What was it? or What did it say? Encourage conversation about the differences.
- This game can start simple, drawing simple shapes or letters and can progress as needed.

Tip

Playing with your children is important for their brain development. This is how the children learn to interact with the world around them. Playing with your child makes them feel special and builds connection.
