What's in the Square?

This easy to create board game with 4 x 4 squares, is a fun way to foster children's logic and matrix thinking.

Learning benefit/skill development

- Develops problem solving skills
- Encourages mathematical thinking
- Improves vocabulary
- Teaches children about turn taking and playing with others
- Boosts attention span

What you'll need

- A cardboard sheet with 4x4 squares in line
- Coloured paper
- A coloured animal cut out or items found around the house that can be grouped and sorted by colours or type.

Instructions

- Place 4 different colours (blue, red, yellow, green) along the top of the square.
- Place 4 different animal cut outs (example: dog, cat, mouse and butterfly)
- To play the game, the player places the card (example blue dog) in the square that matches the dog and the blue colour.
- Take turns between number of players and continue placing a card in the vacant square until all are covered with an item.
